

INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY JULY 9, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was moderate in the Southwest and Southern California Areas and light elsewhere with 224 new fires reported. Seven new large fires were reported, one in the Rocky Mountain Area and three each in Southern California and the Eastern Great Basin Areas. Six large fires were contained, three each in the Southern California and Eastern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah and Wyoming.

SOUTHWEST AREA LARGE FIRES:

ASPEN, Coronado National Forest. A Type 1 Incident Management Team (Oltrogge) is assigned. This fire is in the Pusch Ridge Wilderness Area, 17 miles northeast of Tucson, AZ. Active fire behavior, with short runs in heavy brush were observed along the west flank. Smoldering and creeping along the east and west flanks were observed. Crews are constructing fireline on the western flank with aerial support.

ENCEBADO, Taos Northern Pueblos Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Raley) is assigned. This fire is in timber and brush, one mile south of Taos Pueblo, NM. Active fire behavior with torching and periodic crown fire was observed. Crews and dozers are constructing fireline on the south and east perimeter. Structure protection is in place for 200 residences.

DRY LAKE COMPLEX, Gila National Forest. A Fire Use Management Team (Duncan) is assigned. This lightning caused Wildland Fire Use complex, comprised of the Dry Lake, Sycamore, Moonshine and Granny fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish multiple resource objectives. The Dry Lake fire exhibited active fire behavior on the north flank in pinyon pine, juniper, ponderosa pine and grass. Crews are constructing fireline for possible mitigation actions between the Dry Lake Fire and the Gila Cliff Dwellings.

MOLINA COMPLEX, Santa Fe National Forest. This complex, comprised of the Capulin and Molina fires, is eight miles east of Cundiyo, NM. Strong, gusty winds are hampering containment efforts.

MAPLE, Apache-Sitgreaves National Forest. This fire is in grass and timber, 15 miles east of Clifton, AZ. Creeping fire with intermittent torching and short runs on steeper slopes were observed. Crews are conducting burn out operations from existing barriers and monitoring.

MAVERICK, Apache-Sitgreaves National Forest. This fire is in grass, brush and juniper. Creeping fire with intermittent runs along the northern flank were observed. Crews are holding fireline along the east flank of the fire.

NORTHWEST AREA LARGE FIRES:

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. The complex, previously reported as the Fawn Peak/ Sweet Grass, is comprised of the Fawn Peak, Sweetgrass and Farewell fires and is 13 miles north of Winthrop, WA. The Sweetgrass and Fawn Peak fires have been contained. Moderate fire behavior was observed in sub-alpine fir and heavy timber on the Farewell fire. Crews are constructing indirect attack fireline with support from aerial resources. Very remote access and dangerous terrain are hampering suppression efforts. Precautionary evacuations of the Andrews Creek drainage and the Camp Four Campground remain in place.

RATTLESNAKE CANYON, Colville Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Johnson) is assigned. This fire is in timber and brush, 23 miles southeast of Keller, WA. Extreme fire behavior with torching and spotting was observed. Crews are constructing fireline and conducting burn out operations. Seven structures are threatened on the east side of the fire; structure protection is in place.

PADDLE, Spokane Agency, Bureau of Indian Affairs. This fire is in timber and grass, 18 miles west of Wellpinit, WA. Isolated torching was observed. Crews are strengthening control lines and mopping up.

POWELL CREEK, Southwest Oregon District, Oregon Department of Forestry. This fire is in timber, brush and slash, 13 miles south of Grants Pass, OR. Active fire behavior in heavy fuel was observed. Crews are strengthening control lines and mopping up. Evacuees of the community of Williams have been allowed to return to their residences.

LINK, Deschutes National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is 12 miles northwest of Sisters, OR. Torching, running and spotting were observed in mixed conifer. Crews are constructing fireline and preparing for burn out operations

WILLOW, Umatilla National Forest. This fire is in timber with heavy ground fuels, 25 miles north of Pomeroy, WA. Minimal fire behavior was observed. Crews continue to mop up.

ROCKY MOUNTAIN AREA LARGE FIRES:

BRUSH MOUNTAIN, Grand Junction County. This fire is in spruce, fir, pinyon pine, juniper, brush and grass, 17 miles northwest of De Beque, CO. Active fire with torching, crowning and spotting were observed. Crews are constructing and holding fireline.

BEAVER, Grand Mesa-Uncompahgre-Gunnison National Forest. This fire is in timber, nine miles south-southwest of Placerville, CO. Minimal fire activity was observed in the interior. Personnel are improving natural fuel breaks to confine the fire.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

WOODLOT, Yosemite National Park, National Park Service. A Type 2 Incident Management Team (Rios) has been ordered. This fire is one half mile southwest of El Portal, CA. Active fire behavior was observed. The communities of Foresta and El Portal may be threatened.

NORTH FORK, Merced-Mariposa Unit, California Department of Forestry & Fire Protection. This fire is in oak woodland and heavy brush, six miles south of Oakhurst, CA. Moderate fire behavior was observed. Crews are conducting burn out operations and line construction.

KRN = Kern County Fire Department

BBD = Bakersfield District, Bureau of Land Management

EASTERN GREAT BASIN AREA LARGE FIRES:

SOUTH MARVINE, Fishlake National Forest. This fire is in mixed conifer with dead and downed material, 15 miles north of Loa, UT. Active fire with significant torching and spotting were observed. Crews are strengthening and constructing fireline.

BULLDOG, Richfield Field Office, Bureau of Land Management. This fire is in oak, mountain mahogany, juniper and pinyon pine, 17 miles north of Ticaboo, UT. Active fire with short range spotting was observed. Personnel are monitoring and evaluating fire behavior.

WOODENSHOE, Manti-LaSal National Forest. A Fire Use Management Team (Bonfeld) is assigned. This fire is in the Dark Canyon Wilderness Area, 25 miles west of Blanding, UT. The fire is being managed with a confine/contain strategy. Occasional torching and short uphill runs were observed in mixed conifer and brush. Crews are strengthening control lines, conducting burn out operations and mopping up.

NORTHERN ROCKIES AREA LARGE FIRES:

BAKERS HOLE, Gallatin National Forest. This fire is in lodgepole pine, sagebrush and grass, six miles north of West Yellowstone, MT. Minimal fire activity was observed. Crews are using Minimum Impact Suppression Techniques where possible. Increase in acreage is due to more accurate mapping.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BAKERS HOLE	MT	GNF	600	90	7/10	120	3	5	2	0	125K

OUTLOOK:

Weather Discussion: The disturbance responsible for the recent lightning over the Northwest and Northern Rockies has moved east. In its place, high pressure will begin to strengthen over the west. Moisture remains very limited in the Southwest. In the East, most of the shower activity will be concentrated along a front stretching from the Dakotas to the Mid-Atlantic States and also along the Gulf Coast. High pressure will prevail over the interior portions of Alaska.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton dry with a warming trend. Utah, Arizona Strip continued hot and very dry with very poor humidity recovery.	Idaho, Bridger-Teton 65 to 80 mountains, 80 to 92 valleys. Utah and Arizona Strip 71 to 88 higher elevations, 88 to 103 valleys.	Idaho, Bridger-Teton 15 to 30% mountains, 7 to 17% valleys. Utah, Arizona Strip 2 to 16%.	West to northwest 5 to 15 mph Idaho and Bridger-Teton. Variable 5 to 10 mph Utah and Arizona Strip.
NORTHERN CALIFORNIA AREA Clear except for patches of night and morning fog and low clouds along the coast and in the coastal valleys.	60s near the coast. Inland mid 70s to mid 80s higher elevations and upper 80s to upper 90s lower elevations.	7 to 15% east of the Sierra Cascade Crest and 12 to 24% west of the crest, except 35 to 50% along the coast.	Southwest to northwest 4 to 8 mph with localized afternoon gusts of 12 to 17 mph.

<p>SOUTHWEST AREA Sunny and hot in Arizona and western New Mexico. Partly cloudy eastern New Mexico and west Texas, with slight chance of thunderstorms southeast New Mexico and southwest Texas.</p>	<p>80s mountains, 98 to near 115 lower elevations.</p>	<p>5 to 15% Arizona and western New Mexico, 20 to 40% eastern New Mexico and west Texas.</p>	<p>Winds becoming 10 to 15 mph across the northeast of New Mexico and the panhandle of Texas.</p>
<p>ROCKY MOUNTAIN AREA Partly to mostly sunny. Isolated thunderstorms eastern portions of South Dakota, Nebraska, and Kansas. Dry and hot elsewhere.</p>	<p>Hot with temperatures in the mid 80s to mid 90s. 75 to 85 Mountains.</p>	<p>Less than 15% western Colorado and southern Wyoming. 15 to 25% elsewhere.</p>	<p>Northwest 15 to 25 mph over the plains of Kansas, Nebraska and South Dakota. Variable wind 5 to 15 mph elsewhere.</p>
<p>NORTHWEST AREA Morning clouds west of the Cascades. Sunny east.</p>	<p>Becoming warmer. Mostly 70s to 80s west of the Cascades except 90s southwest Oregon. Generally 80s to lower 90s eastside.</p>	<p>West of Cascades mostly 30 to 50% except locally as low as 20% in southwest Oregon. Eastside 15 to 30% except as low as 10% southeast Oregon deserts.</p>	<p>Generally 10 mph or less, west of the Cascades. East of the Cascades 5 to 15 mph except stronger gusts near the Columbia River Gorge.</p>
<p>WESTERN GREAT BASIN AREA Sunny and hot, with localized late afternoon breezes.</p>	<p>Mid 90s to mid 100s valleys, 80s mountains, and 70s and 80s Sierras, with a maximum of 110 in the southern deserts.</p>	<p>2 to 12% at lower elevations, 5 to 17% in upper elevations and 10 to 20% in the Sierras.</p>	<p>West or southwest at 5 to 15 mph with localized gusts to 20 mph.</p>
<p>NORTHERN ROCKIES AREA Mostly Sunny</p>	<p>75 to 90</p>	<p>15 to 25%</p>	<p>West 10 to 15 mph except 15 to 25 mph, increasing 20 to 35 mph in the afternoon along the front range.</p>
<p>SOUTHERN CALIFORNIA AREA Patchy morning low clouds and fog coastal areas, otherwise mostly sunny.</p>	<p>70 to 90 coastline 85 to 105 mountains. 100 to 110 valleys. 100 to 110 upper desert. 110 to 125 low desert.</p>	<p>5 to 15% deserts. 5 to 15% mountains. 10 to 20% valleys.</p>	<p>Southwest to northwest 5 to 15 mph.</p>

DOZER/TRACTOR PLOW OPERATIONS

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety. (See Fireline Handbook, Appendix A, for hand signals.)
- Do not use a dozer or tractor plow without a canopy or brush guard and radio communications.
- Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.
- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.
